a. Pharmacy Update: Effective 3 Oct 05, the 30th Medical Group Pharmacy will employ computer technology known as the Q-Matic® System. This queuing management system routes patient flow to multiple windows and tracks their waiting time. The new process begins when a patient picks a number based on a priority system. **Priority A** is for active-duty service members in uniform and **Priority B** for post-operative patients. This allows the active-duty member to return to work quicker, and the patient who has had an operation to get his pain medication and go home to recover. **Priority C** is for patients seen by the 30th Medical Group providers. **Priority D** is for all other patients. The goal at 30th Medical Group Pharmacy is to be the patients' preferred choice. Through improved services and more efficient patient care, the pharmacy staff is focused on exceeding the customer's pharmaceutical expectations.

d. Oral Health and Pregnancy: If you are pregnant, now is the time to pay extra attention to your teeth and gums. Women with previously healthy smiles may notice that their gums become swollen or inflamed or they may bleed during pregnancy. This condition results from changing hormone levels. It is plaque, however, not hormone levels, that is the major cause of gum disease. Prevent tooth decay and gingivitis by keeping your teeth clean, especially around the gum line. More frequent cleanings may be requested to help control gingivitis.
